

## **Senior Vice President – Corporate Engineering**

Vyve Broadband, founded in 2012, is an innovative company serving largely non-urban communities in eight states, including Oklahoma, Texas, Arkansas, Kansas, Louisiana, Tennessee, Georgia and Wyoming. A technology leader in the cable and broadband sectors, Vyve Broadband offers an extensive range of broadband, fiber connectivity, cable television and voice services for commercial and residential customers. Vyve was formed as a platform to provide the very best next-generation services and features available, along with a sector-leading customer experience. Residential services include high speed Internet with speeds up to 1 Gig, all-digital, high-definition video and fully featured digital voice. Vyve Business Services include optical Ethernet, PRI and hosted voice services for the business community. <https://www.vyvebroadband.com/>

### **Job Summary:**

Responsible for development and integration of Vyve Broadband technology strategy, technology platforms and delivery systems. Provide leadership and oversight re: engineering, design and creation of operational standards used in the company's High Speed Data, Video, Voice, Fixed Wireless, and Wi-Fi product offerings. This position takes ownership of all information and communications technology hardware, software and strategy recommendations and thereafter, ownership of uptime and impacts on service delivery to all internal and external endpoints.

This SVP opportunity is located at our Rye Brook, NY headquarters (Westchester County, 30 miles outside New York City, on the Connecticut border); willing to discuss other locations. Relocation assistance will be available for remote candidates. Field engineering team is based in Shawnee, OK, a suburb of Oklahoma City.

### **Responsibilities:**

- Member of the Vyve Senior Management Team (“SMT”), along with CEO, CFO, General Counsel and SVP’s of Marketing and Customer Experience, Sales and Business Services, Human Resources, and Planning and Budgeting
- Establish the Company's technical vision and lead all aspects of its technological development
- Develop and own the Vyve technology roadmap
- Help drive the Company's strategic direction, development and future growth
- Understand the evolving regulatory issues impacting technical and engineering decisions and operations via relationships with NCTA, SCTE, or Cable Labs and Vyve peers.
- Establish technology strategy to provide the best customer experience, maintain highest possible uptime and minimize service outages
- Working closely on a daily basis with the operations department and in a consultative fashion with other departments including Marketing, Sales, Finance
- Provide leadership to subordinate employees in a manner that supports and seeks to improve the Company's culture and employee satisfaction
- Conduct research on leading edge technologies and make determinations on the advisability of Vyve implementation
- Assess the Company's infrastructure to ensure functionality, efficiency and reliability

- Responsible for setting company engineering/technical standards to be followed by all technical departments and ensure quality assurance/quality control measures are adequate and effective
- Monitor KPIs and make technical operating decisions as required to meet Vyve business standards and business plans
- Gather stakeholder feedback to inform necessary improvements and adjustments to products and/or processes
- Act as a steward of company resources and ensure control of the Engineering department budget
- Participate in and represent Vyve Broadband at technical industry level (CableLabs, SCTE, etc.)

### **Requirements:**

- Master's degree in Engineering, Electrical Engineering, Physics, Mechanical Engineering, or similar required
- 10+ years of experience working for a cable/internet technology-focused firm, 5+ years of which must be in a leadership role that was both managerial and strategic. Prior senior engineering experience highly preferred. Experience managing a cross-functional workforce is required
- Knowledge of all aspects of analog/digital video, voice and data technology
- Knowledge of both Residential and Commercial service products which include the following: residential high-speed Internet in a DOCSIS 3.0/3.1 environment; all-digital, high-definition video and fully featured digital voice. Vyve Business Services provides optical Ethernet, PRI and hosted voice services to the business community; Vyve Wireless is a newly-launched fixed wireless broadband offering presently deployed on a Cambium platform
- Knowledge and/or experience with IP video transition strategies. Implement the right network investment decisions anticipating future business needs.
- Ability to effectively manage and lead a group of Engineers of various disciplines
- Ability to effectively communicate in both written and verbal form
- Ability to lead, inspire, and motivate all levels of employees
- Must be skilled and comfortable with public speaking, both to employees and those outside of the Company
- Skilled in designing and delivering presentations to help field and SMT understand and implement the Vyve technical roadmap and current initiatives
- Ability to conduct technological analyses and research, and report on findings to other department heads
- Knowledge of technical trends that will impact strategic decisions. Have and maintain valued relationships with other senior technical executives across the cable industry, particularly the mid-market and smaller market operators in suburban and rural markets.
- Regular travel expected, with substantial time spent in the field as needed

### **WE PROUDLY OFFER:**

- A friendly and fun work environment
- Communication and training
- Great benefits package
- Employees that live in our markets are eligible for courtesy cable including free or reduced priced video, internet AND voice services
- A culture that encourages growth
